

Developer Student Clubs are university based community groups for students interested in Google developer technologies. Students from all undergraduate or graduate programs with an interest in growing as a developer are welcome. By joining a DSC, students grow their knowledge in a peer-to-peer learning environment and build solutions for local businesses and their community.

What does DSC-AKGEC do?

We at DSC-AKGEC are a passionate group of people who work towards bringing a change in the ecosystem of development around the campus. We want to create a healthy environment for the budding developers to exploring solutions to real life problems and promote the developer culture.

Fields we work in

Machine Learning

Machine learning is the burning topic of the market. It is an application of artificial intelligence (AI) that provides systems, the ability to automatically learn and improve from experience without being explicitly programmed.

Management

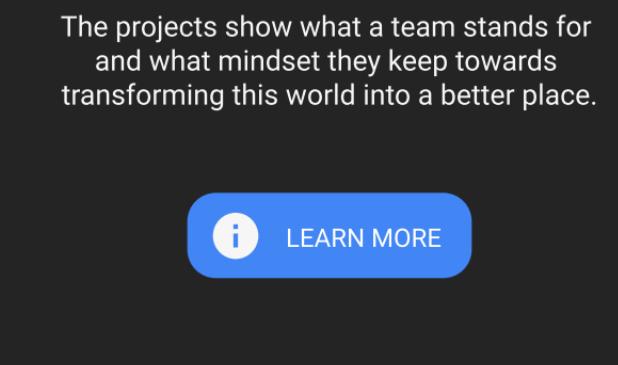

For the growth of all and to bring chances for all the domains to excel and also develop teamwork skills, we provide managerial domain to increase the productivity of all our members by being the face of this society and bring forth new projects.

App Development

Mobile app development has been steadily growing, in revenues and jobs created. In this domain and all others, we encourage all to keep practising and be their best selves.

Web Development

In this domain, we concentrate on developing and maintaining websites to solve real time problems. For any website, it's the work that happens behind the scenes to make a website look great, work fast and perform well with a seamless user experience.

Developer Student Clubs
AKGEC PRESENTS

MACHINE LEARNING WORKSHOP

- From July 3rd - 6th
- 5:30 PM - 6:30 PM

ML Workshop

This workshop gives you the gist of python basics, algorithms used in machine learning and how to move forward in this domain. It is a 4-day hourly workshop. A competition planned at the end of the workshop for all the young minds.

Android Study Jams

This workshop gives you the gist of python basics, algorithms used in machine learning and how to move forward in this domain. It is a 4-day hourly workshop. A competition planned at the end of the workshop for all the young minds.

Hackfest 3

This workshop gives you the gist of python basics, algorithms used in machine learning and how to move forward in this domain. It is a 4-day hourly workshop. A competition planned at the end of the workshop for all the young minds.

Projects

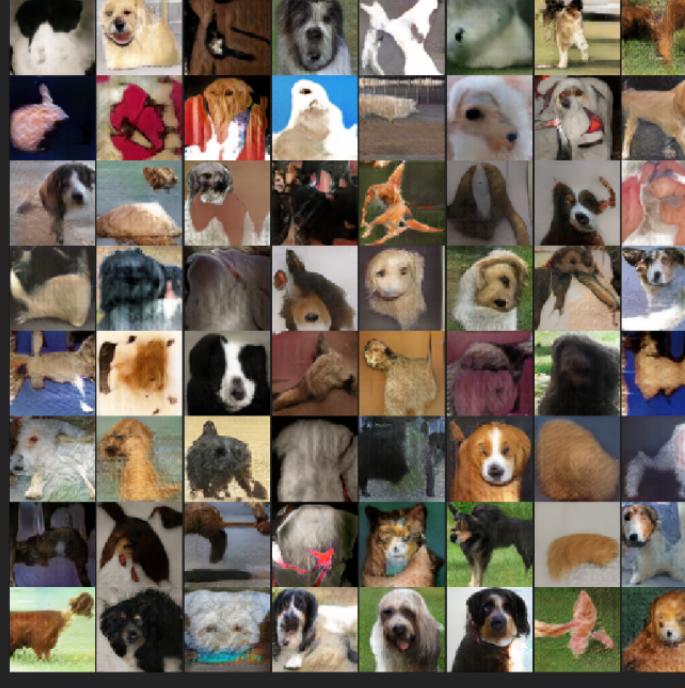

The projects show what a team stands for and what mindset they keep towards transforming this world into a better place.

Generative Dog Images

This project generated us fake images of dogs learnt from real ones that exists using Generative Adversarial Networks. Our project is based on the concept of GAN(Generative Adversarial Networks).

The screenshot shows the homepage of the Workspace website. At the top, there's a navigation bar with 'WORKSPACE' in orange and links for 'HOME', 'GALLERY', 'CONTACT', and 'ABOUT'. Below the navigation is a large banner featuring a photo of a modern workspace with people working. The banner has the text 'Choose the right WORKSPACE' and 'WORK TOGETHER | DREAM BIG'. At the bottom of the page is a contact form with fields for 'Name', 'E-Mail', 'Location(Delhi NCR)', 'Phone Number', and a 'Submit' button.

Workspace

Its a website for a Startup idea , Workspace in which we will provide workspace to growing startups on the basis of there need , at low costs
